

1. CoMeT-40

Remark: CoMeT 40/2 or CoMeT 40/3 as a set in a transport case

Picture	Art. Nr.	Rosenberger	Description
A	242013	107157	CoMeT- test- head 40/2 up to 3 GHz
B	242043	213440	CoMeT- test- head 40/3 up to 9 GHz

The measurement system CoMeT 40/x (Coupling- Measurement- Tube) is applicable for the measurement of “ transfer impedance” and “ screening- or coupling attenuation ” on communication cables, assemblies and connectors according to IEC 62153-4-3, IEC 62153-4-4 and IEC 62153-4-7 up to and above 3 GHz with one test setup.

Picture	Art-Nr.:	Rosenberger	Description
2.1 / 2.2	242218	351556	CoMeT 90/1 test fixture compl., 6.0-22.0mm

The measurement system CoMeT 90/1 (Coupling- Measurement- Tube) is applicable for the measurement of “transfer impedance” and “screening- or coupling attenuation” on communication cables, assemblies and connectors according to IEC 62153-4-3, IEC 62153-4-4 and IEC 62153-4-7 up to 2 GHz with one test setup. The diameter of the shield should be in discrete steps in the range from 6mm to 22mm.
